

HEIDI LAURENT

(603) 568-5669 | [Email](#) | Laconia, NH | [Website](#)

PROFESSIONAL SUMMARY

Healthcare Data and Operations Professional with experience analyzing healthcare documentation, Medicaid program data, operational reporting, and healthcare workflows. Skilled in SQL, Python, data validation, reporting, root-cause analysis, process improvement, and translating complex information into actionable business insights. Strong understanding of healthcare operations, HIPAA requirements, and healthcare information systems.

TECHNOLOGY

- | | | |
|--------------|-------------------|----------------------------------|

| • React | • Data Validation | |

Data Analytics Projects

Healthcare Workforce Staffing Analysis

Analyzed payroll-based staffing data, facility quality ratings, health inspection results, and compliance measures from 14,000+ U.S. nursing homes using PostgreSQL and SQL. Built a 4-page interactive Power BI dashboard examining staffing levels, facility performance, staffing mix, and regulatory compliance.

- Identified that RN staffing hours are the strongest predictor of overall facility quality ratings across all ownership types
- Found that government and nonprofit facilities consistently outperform for-profit organizations in quality ratings and compliance outcomes
- Revealed that heavy reliance on contract staffing does not improve quality outcomes and often corresponds with lower ratings
- Determined that Kentucky and Texas carry the highest total penalty burdens, while for-profit corporations account for the largest share of total fines nationwide

Tools: PostgreSQL, SQL, Power BI

Medicare Healthcare Utilization & Spending Analysis

Analyzed Medicare beneficiary enrollment, inpatient claims, outpatient claims, and prescription drug event data for approximately 10,000 beneficiaries and over one million healthcare service events using PostgreSQL and SQL. Built a multi-page Power BI dashboard evaluating spending, utilization, and high-cost populations.

- Identified that outpatient services accounted for over 60% of total healthcare expenditures exceeding \$2.25 billion across all service categories
- Revealed that a small subset of beneficiaries generated disproportionately high costs, with the highest-cost beneficiary accounting for approximately \$49 million in expenditures
- Found that beneficiaries under age 65 represented the largest enrollment group, reflecting inclusion of disabled Medicare populations

Tools: PostgreSQL, SQL, Power BI

Hospital Readmission Risk Analysis

Analyzed 101,766 diabetic patient encounters using PostgreSQL and SQL to identify factors associated with 30-day hospital readmissions. Built an interactive Power BI dashboard evaluating readmission trends across age groups, length of stay, medication complexity, and insulin treatment.

- Found that patients with 5 prior inpatient visits had a 31.4% readmission rate compared to 8.44% for patients with no prior visits
- Identified that longer hospital stays (8-10 days) corresponded with readmission rates of ~14%, compared to 8.18% for single-day stays
- Determined that greater medication complexity and insulin dosage adjustments were associated with increased readmission risk

Tools: PostgreSQL, SQL, Power BI

Kickstarter Campaign Success Analysis

Imported, cleaned, and analyzed 378,661 Kickstarter campaign records using PostgreSQL and SQL. Built a Power BI dashboard to evaluate campaign outcomes, funding goals, and category trends.

- Found that 52.2% of campaigns failed while only 35.4% successfully reached their funding goals
- Identified that successful campaigns averaged a funding goal of ~\$10,163 versus ~\$67,347 for failed campaigns, demonstrating that lower funding targets significantly increase success likelihood
- Determined that Film & Video, Music, and Publishing were the most common campaign categories on the platform

Tools: PostgreSQL, SQL, Power BI

CORE QUALIFICATIONS

Healthcare Information Management - Client databases, care plans, intake assessments, document review, financial reporting, invoicing

Quality & Accuracy - 100% Medicaid documentation compliance, grammar/formatting review, workflow improvements

Stakeholder Communication – Cross-functional collaboration, escalation management, presentation of findings, stakeholder support, communication with technical and non-technical audiences

Microsoft Excel & Reporting – Data validation, reporting, spreadsheet analysis, operational reporting, and documentation review

Data & Systems Analysis – Healthcare information systems, electronic records management, data analysis, reporting, workflow optimization, process improvement

Operations & Workflow Support - Scheduling, mail/package processing, fax and email handling, office coordination

Privacy & Compliance - HIPAA compliance, ROI authorization verification, confidentiality, Medicaid documentation, regulated data handling

Release of Information - Authorization validation, documentation review, HIPAA-compliant information disclosure, records management

RELEVANT PROJECT

SocialBright - Healthcare Data & Case Management Platform (React, Django, PostgreSQL)

In progress

Demonstrates applied understanding of HIPAA-oriented systems and structured client data management.

- Designed and developed a HIPAA-aligned case management platform supporting client demographics, documentation, care planning, contacts, reporting, and workflow management.
- Gathered requirements from healthcare and case management professionals and translated operational needs into system functionality.
- Designed healthcare workflows to improve documentation accuracy, compliance tracking, and client management processes.
- Utilized React, Django, PostgreSQL, SQL, REST APIs, and cloud-based technologies.
- Developed reporting and data management features to support healthcare operations and regulatory compliance.
- Performed system testing, feature validation, and iterative workflow improvements based on user feedback.
- Utilized SQL queries and database structures to manage, validate, and organize healthcare-related data supporting reporting and operational workflows.
- Supported data validation, reporting design, and workflow analysis activities to improve data accuracy and operational efficiency.

SELECTED ANALYTICS EXPERIENCE

- Generated operational, Medicaid service, invoicing, financial, and caseload reports for department leadership
- Analyzed client, billing, Medicaid service, and operational data to identify trends, perform root-cause analysis, and support leadership decision-making.
- Utilized SQL, Excel, reporting tools, and healthcare data systems to support workflow optimization, data validation, and data management.
- Developed healthcare reporting and data management functionality through SocialBright case management platform

PROFESSIONAL EXPERIENCE

Granite Case Management - Case Manager

4/2025 - Current

Manage community-based services for elderly and disabled clients in a Medicaid-regulated environment.

- Manage healthcare operations and service coordination for a Medicaid-regulated caseload of 50 clients.
- Manage healthcare documentation, assessments, authorizations, care plans, and compliance activities for a Medicaid-regulated caseload.
- Analyze client needs and coordinate services across providers, agencies, and support systems.
- Utilize electronic healthcare record systems to maintain documentation accuracy and regulatory compliance.
- Identify workflow inefficiencies and implement process improvements to ensure timely service delivery.
- Review and validate Release of Information authorizations and documentation requirements.

Community Bridges - Administrative Assistant to ESS

5/2017 - 9/2018

Administrative support for a team of home-based case managers.

- Generated recurring operational, caseload, Medicaid service, invoicing, and financial reports for department leadership using organizational data and reporting systems.
- Analyzed client, billing, caseload, Medicaid service, and operational data to identify trends, support resource allocation, and assist leadership decision-making.
- Maintained and audited confidential client records and documentation supporting approximately 300 clients.
- Coordinated intake processes and documentation workflows between clients, providers, and internal staff.
- Supported healthcare operations for a team of 15–20 case managers.

Belknap Subaru - Service BDC Representative		10/2024 - 4/2025
<i>Customer service</i>		
Coordinated customer scheduling, appointment management, and service communications while maintaining accurate customer records.		
Conduent - Technical Customer Service Advisor		6/2024 - 10/2024
<i>High-volume customer support and issue resolution</i>		
- Resolved complex technical issues through troubleshooting, system analysis, and root-cause identification while maintaining high customer satisfaction. - Reduced escalations by 15% through systematic troubleshooting and issue resolution.		
Irwin Automotive Group - Title Clerk		4/2023 - 6/2024
<i>Document processing & compliance</i>		
Processed 75+ title documents per week across 20+ states; reduced processing time by 20% through improved workflows		
Anserve, Inc. - Supervisor		2/2023 - 7/2023
Dispatcher		11/2022 - 2/2023
Remote Operator		8/2022 - 11/2022
<i>Medical call center operations & healthcare communications</i>		
- Supervised 20+ call center agents; trained ~5 new employees with ongoing coaching - Coordinated high-volume healthcare communications while resolving complex operational issues and escalations in a fast-paced environment. - Maintained confidentiality and compliance in a fast-paced call center environment		
Irving Energy - Liquid Energy Customer Service Representative		10/2014 - 3/2015
<i>Customer account management & service coordination</i>		
Managed customer account records, coordinated service requests, and maintained accurate data within company systems.		
Always on Call Answering Service - Shift Supervisor		3/2013 - 9/2014
Dispatcher		1/2013 - 3/2013
Operator		12/2012 - 1/2013
<i>High-volume customer service & sensitive communications</i>		
- Supervised 10–15 operators while improving communication workflows, standardizing procedures, and supporting operational efficiency. - Conducted performance reviews and coaching; standardized procedures to reduce average hold times		
Holmes Flooring & Cabinetry - Administrative Assistant		4/2012 - 12/2012
<i>Administrative support & office operations</i>		
Managed orders, scheduling, correspondence, and administrative records while supporting daily office operations.		
Heritage Case Management - Administrative Assistant		10/2007 - 4/2012
<i>Supported confidential client operations and daily patient communication.</i>		
- Maintained and updated confidential client records for approximately 500 individuals while ensuring documentation accuracy and privacy compliance - Coordinated client communications while maintaining confidentiality and documentation accuracy. - Processed and distributed 20–30 pieces of mail and packages daily		

EDUCATION

Champlain College – B.S. in Web Design and Development (In Progress)
Champlain College – Certificate in Web Design & Development (2026)
Great Bay Community College – Introduction to SQL (2024) | Intermediate SQL (2024)
